

# **DO YOU SUFFER FROM FIBROMYALGIA?**

## **Common Symptoms Include:**

- **Chronic pain and stiffness in different parts of the body**
- **Fatigue that interferes with work and daily activities**
- **Sleep problems — Difficulty falling and staying asleep, waking up feeling tired**
- **Chronic headaches**

Doctors at American Medical Research are conducting a research study of an investigational medication for patients who suffer from Fibromyalgia.

You will receive all study medication, study related procedures and evaluations, at no cost to you. In addition, eligible subjects will receive compensation for study participation.
